Official languages: **Czech, English**
No registration fee required

About the Conference

We symbolically associate the first year of the conference with World Stroke Day. We would like to connect organizations / institutions, which, despite having members from various fields, share a common goal – provision of quality follow-up care. The conference is intended for professionals with experience in the fields of healthcare and social services, patient organizations providing follow-up care to individuals with acquired brain injury.

Conference participants will be given an inside look into other organizations, their follow-up care approaches and will be able to learn new methods and gain knowledge from participating experts.

CALL FOR SUBMISSION OF ABSTRACTS / PAPERS

You are cordially invited to enter your presentation abstracts. Topic of your paper should represent the area of your professional interest in connection to the main theme of the conference. If you would like to share your experience from a different area of your professional interest, we kindly request the topic to remain within context of the subject matter and focus of the conference. This will contribute to the mutual exchange of knowledge and good practice in the field of Follow-up care.
